OEM FILLER AUDITS

ProMach Filling Systems offers filler audits for every Federal or Pacific filler regardless of its age, condition or location

ProMach Filling Systems offers OEM filler auditing services for every Federal and Pacific filler regardless of its age, condition or location. Filler audits take the guesswork out of troubleshooting and help maintenance personnel get their Federal and Pacific fillers back into top condition.

HIGHLIGHTS

- Detailed audit ProMach Filling Systems checklists assure fillers are inspected and evaluated from infeed to discharge
- Full audits are performed for fillers currently in operation
- Partial audits are performed for fillers in storage
- Full and partial audits are documented with a written Filler Audit Summary

ADDITIONAL HIGHLIGHTS

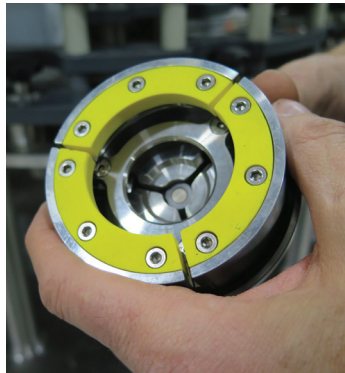

- Recommended maintenance and required parts are noted in the Filler Audit Summary
- Every filler audit includes a discount for parts ordered within forty-five (45) days
- Fixed, flat rate travel time and travel expenses
- OEM filler audits take the guess work out of trouble shooting issues with your Federal filler
- All filler audits completed by highly trained and experienced ProMach Filling Systems Field Service Engineers

ADDITIONAL HIGHLIGHTS

- Audits of production fillers are completed in four (4) to six (6) hours and require approximately one hour of down time
- Field audits of fillers in storage are completed in approximately four (4) hours
- The results of the audit for each filler evaluated are documented in a Filler Audit Summary
- Parts and service quotes can be generated based on filler audits

DETAILS

- Each filler audit includes an OEM parts discount for all recommended parts ordered within forty-five (45) days of an audit
- Labor hours, travel time and travel expenses are fixed at time of quotation
- Fixed travel time and fixed travel expenses make budget management easier

WHY FILLER AUDITS?

- When a filler's performance has slipped after years of use, audits are a great way to identify what needs to be done to get it back to rated speeds and target filling quality
- Audits and follow-up maintenance support quickly pay for themselves by increasing production speeds and improving filling quality
- Adds highly skilled know-how to your team without adding to head count. They are a great option for plants that have lost their Federal filler experts to retirements, promotions and transfers
- Audits are a great investment for buyers and sellers of used Federal and Pacific fillers
- Buyers can better understand what they are buying and what it will take to get a filler production ready
- Sellers can more accurately price their equipment based on an OEM evaluation
- Sellers can shorten the time required to sell a used filler, reducing risk for the buyer
